

Environment Setup For Programming Practices

1. Download Python

To download Python, go to Python's official website & Download python installation file.

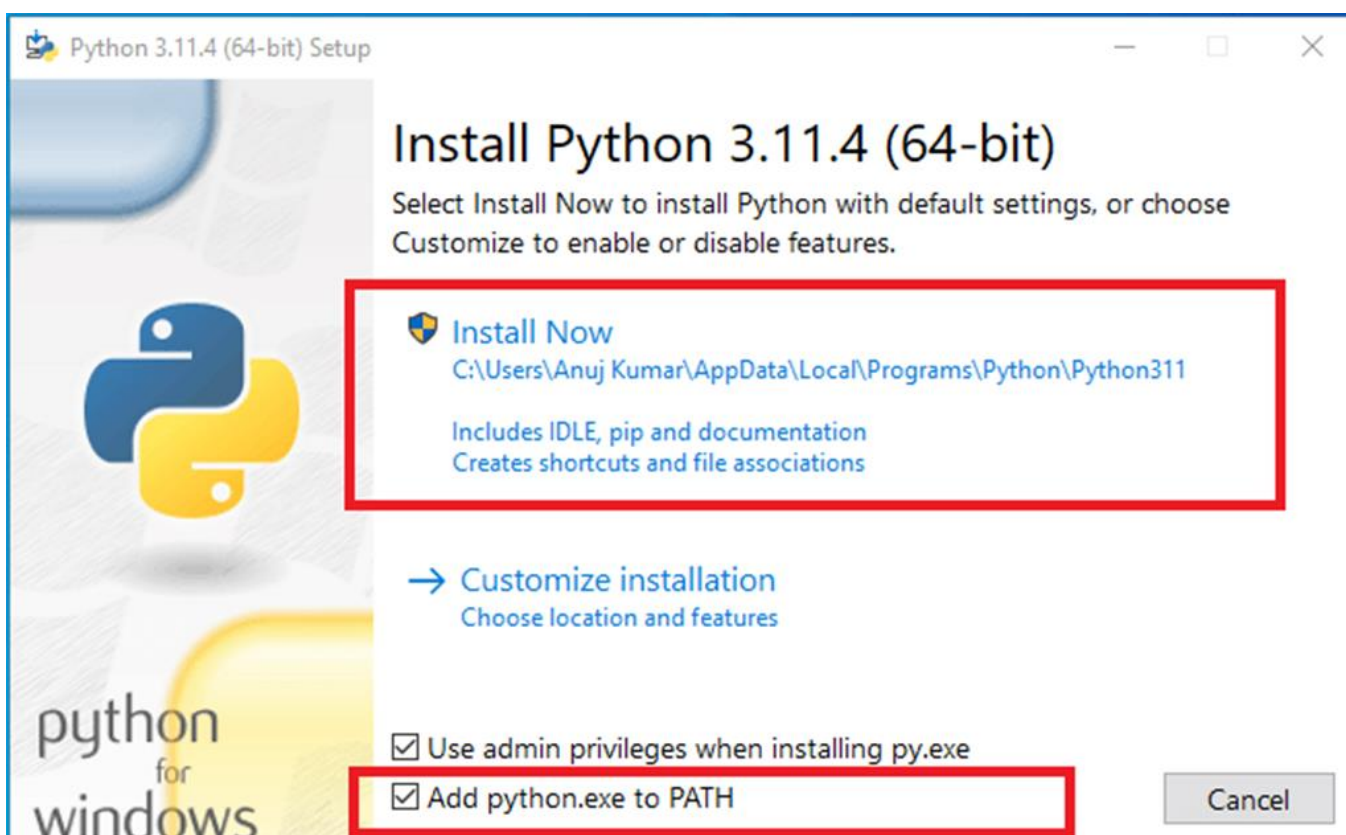

2. Install Python

Now, go to the "Downloads" folder on your Windows 10 system and double-click on the "python-3.8.2-amd64.exe" file.

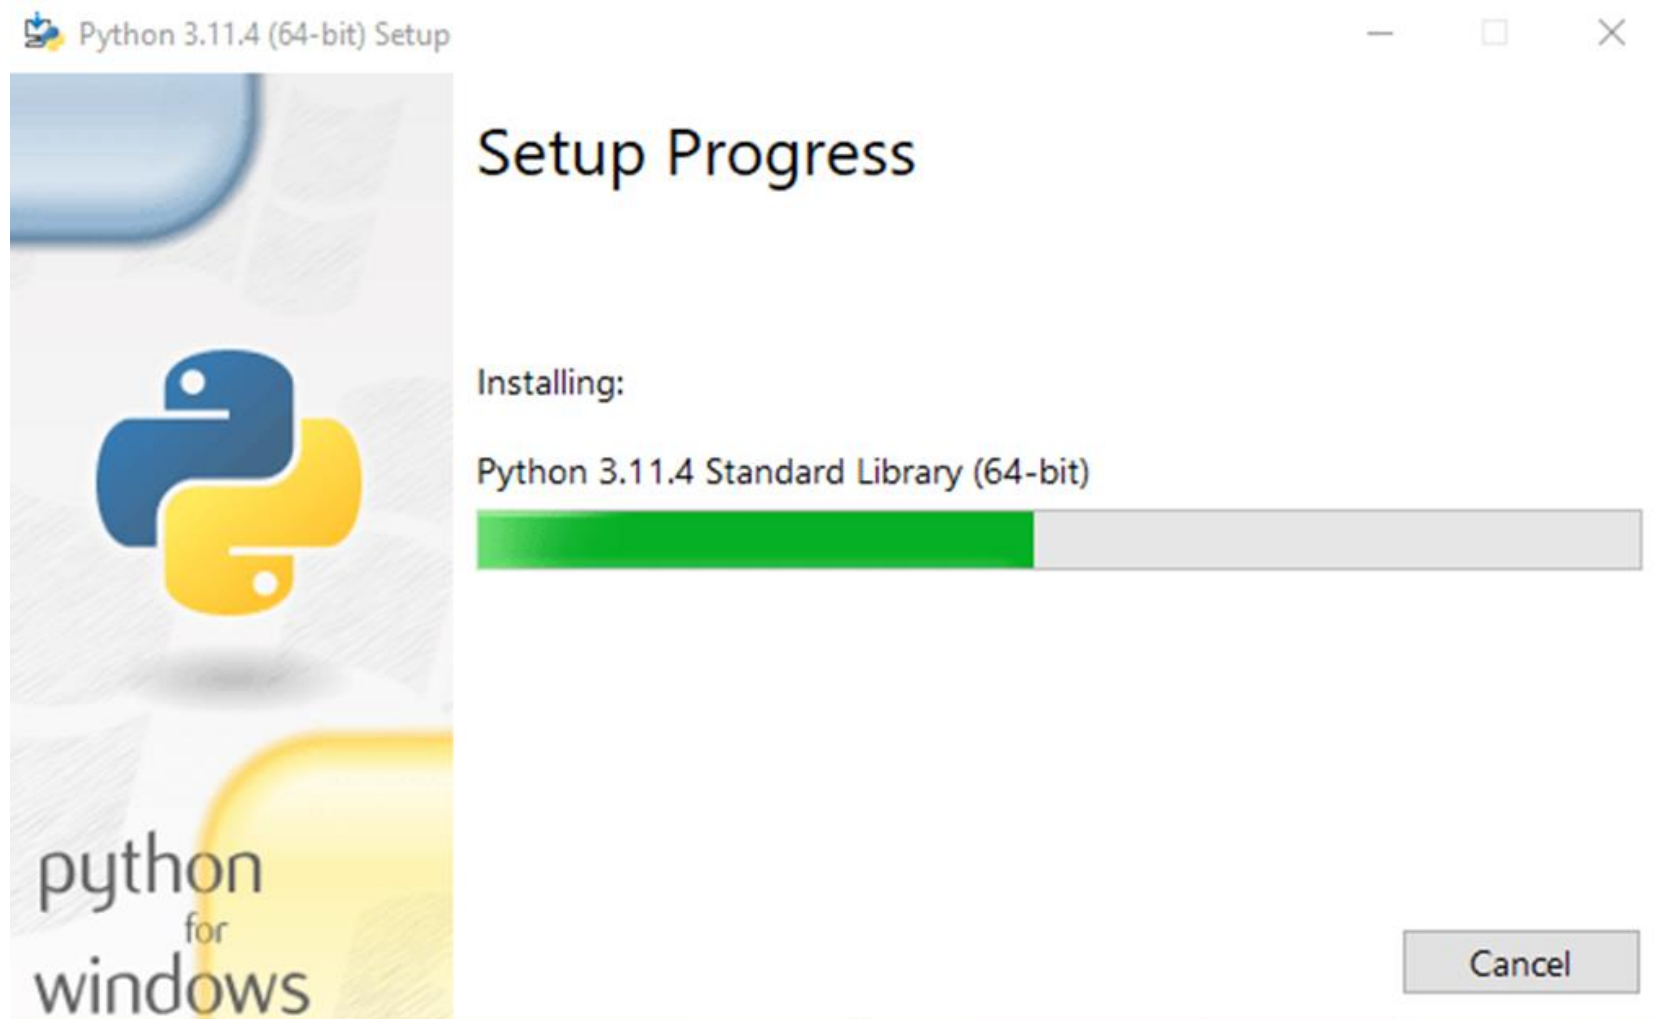

Double-click the downloaded installer (python-3.8.2-amd64.exe file).

Check the box "Add Python.exe to PATH" during installation.

It'll take a few minutes to complete the setup.

Once the installation is complete, you will get the below screen:
